Registered Users (includes above)

3. Shall be able to flag listings as inappropriate

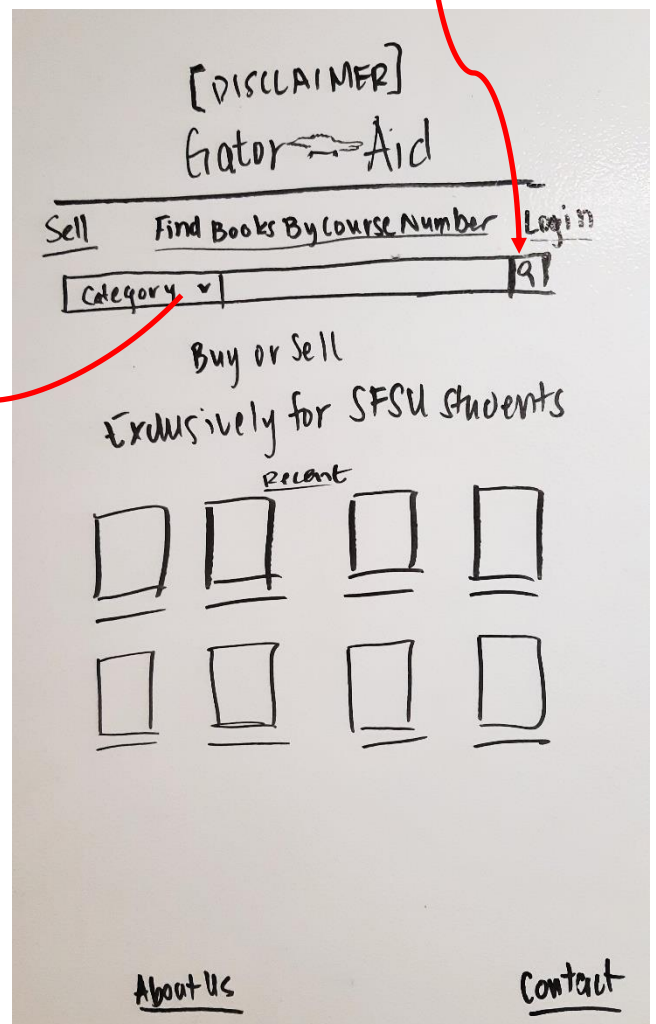

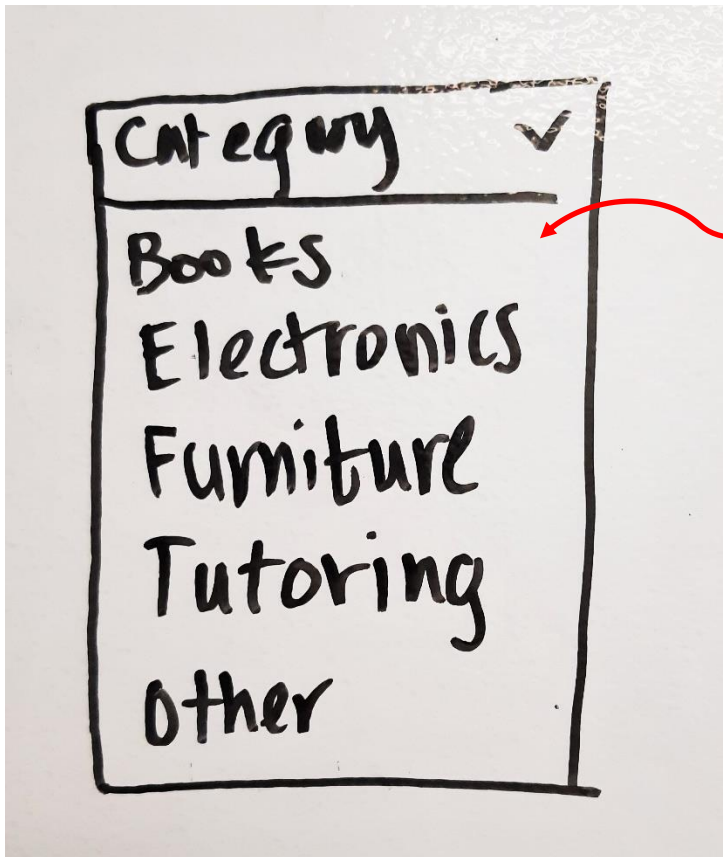

Administrator (includes above)

4. Shall be able to ban accounts.

Use Case 1: Unregistered User

Alexa wants to buy a certain electronic item. She searches Gator-Aid after selecting the Electronics category, finds the item she wants, and clicks on the listing. She clicks Buy and is prompted to log in or register. Once she does, she can message the seller.

Alexa selects
"Electronics" from drop-
down Category list (seen
left), types in her search
query, and clicks the
search icon.

Log-in pop up

A hand-drawn sketch of a log-in pop-up form. It features a rectangular border with a close button (an 'X' in a square) in the top right corner. Inside the form, there are two input fields: the first is labeled 'username' and the second is labeled 'password'. Below these fields is a button labeled 'Log In'. Underneath the button, there are two links: 'Forgot Password?' and 'Register', both underlined. A red arrow points from the 'Register' link to the registration pop-up form below.

Registration pop up

A hand-drawn sketch of a registration pop-up form. It has a rectangular border with a close button (an 'X' in a square) in the top right corner. The title 'Create New Account' is at the top. Below the title are four input fields: 'SFSU email', 'username', 'password', and 'confirm password'. Below these fields is a checkbox followed by the text 'I agree to Terms & Conditions.', where 'Terms & Conditions' is underlined. At the bottom is a button labeled 'Register'. Two red arrows point from the left towards the checkbox and the 'Register' button.
